Best Doctors

HOW WE DID IT: This list is excerpted from the Best Doctors in America 2017-18 database, which includes close to 40,000 U.S. doctors in

more than 40 medical specialties and 450 subspecialties. The Best Doctors in America database is compiled and maintained by Best Doctors Inc. For more information, visit bestdoctors.com or contact Best Doctors by telephone at 800-675-1199 or by email at research@bestdoctors.com. Please note that lists of doctors are not available on the Best Doctors website. The specialty of plastic surgery was omitted after the information was provided by Best Doctors Inc.

Best Doctors Inc. has used its best efforts in assembling material for this list, but does not warrant that the information contained herein is complete or accurate, and does not assume, and hereby disclaims, any liability to any person or other party for any loss or damage caused by errors or omissions herein, whether such errors or omissions result from negligence, accident, or any other cause.

FOUNDED IN 1989 by Harvard Medical School physicians, Best Doctors is a global benefits provider and medical information services company that connects individuals facing difficult medical treatment decisions with the best doctors, selected by impartial peer review in more than 450 subspecialties of medicine, to review their diagnosis and treatment plans. Best Doctors seamlessly integrates its services with employers' other health-related benefits to serve more than 40 million members in every major region of the world.

More than a traditional second opinion, Best Doctors delivers a comprehensive evaluation of a patient's medical condition — providing value to both patients and treating physicians. By utilizing Best Doctors, members have access to the brightest minds in medicine to ensure the right diagnosis and treatment plan.

Best Doctors' team of researchers conducts a biennial poll using the methodology that mimics the informal peer-to-peer process doctors themselves use to identify the right specialists for their patients. Using a polling method and proprietary balloting software, they gather the insight and experience of tens of thousands of leading specialists all over the country, while confirming their credentials and specific areas of expertise.

The result is the Best Doctors in America List, which includes the nation's most respected specialists and outstanding primary care physicians. These are the doctors that other doctors recognize as the best in their fields. They cannot pay a fee and are not paid to be listed and cannot nominate or vote for themselves. It is a list which is truly unbiased and respected by the medical profession and patients alike as the source of top quality medical information.

Best Doctors' innovative services include access to an unrivaled database of physicians who have been selected as the best in their field by other leading physicians, analytics and technology. With every service offered, the goal remains the same: to help people in need get the right diagnosis and treatment, significantly improving health outcomes while reducing costs.
